WHOLEHEMP

Premium Flower

Since 1995

WHOLEHEMP'S ROOTS ARE DEEP – THEY STRETCH BACK TO 1995 WHEN WE STARTED OUR FIRST HEMP BUSINESS. FOR WELL OVER 25 YEARS, WE HAVE BEEN INVOLVED IN THE CANADIAN HEMP INDUSTRY THROUGH OUR BUSINESSES, ORGANIZATIONS WE HAVE STARTED & SUPPORT AND A VARIETY OF RESEARCH PROGRAMS. HEMP IS OUR PASSION!

We work closely with local farmers (many of whom are women) to source the highest quality high CBD flower. WholeHemp products are full spectrum, whole plant CBD products which contain not only CBD but other trace cannabinoids and terpenes which together have a synergistic effect commonly known as the entourage effect.

Our high THC flower which we blend with our WholeHemp CBD flower in our ABIDE+WholeHemp line is sungrown outdoors by us at our organically certified farm in the beautiful Trent Hills. We employ cover crops and a wide range of regenerative practices to the benefit of our cannabis, the soil and local ecosystems.

We produce all of our products by hand in small batches. When you purchase WholeHemp products, you can buy with the confidence that you are supporting environmentally friendly local farmers and a producer with decades of knowledge and the highest levels of quality.

\$19.95

Sungrown in Ontario

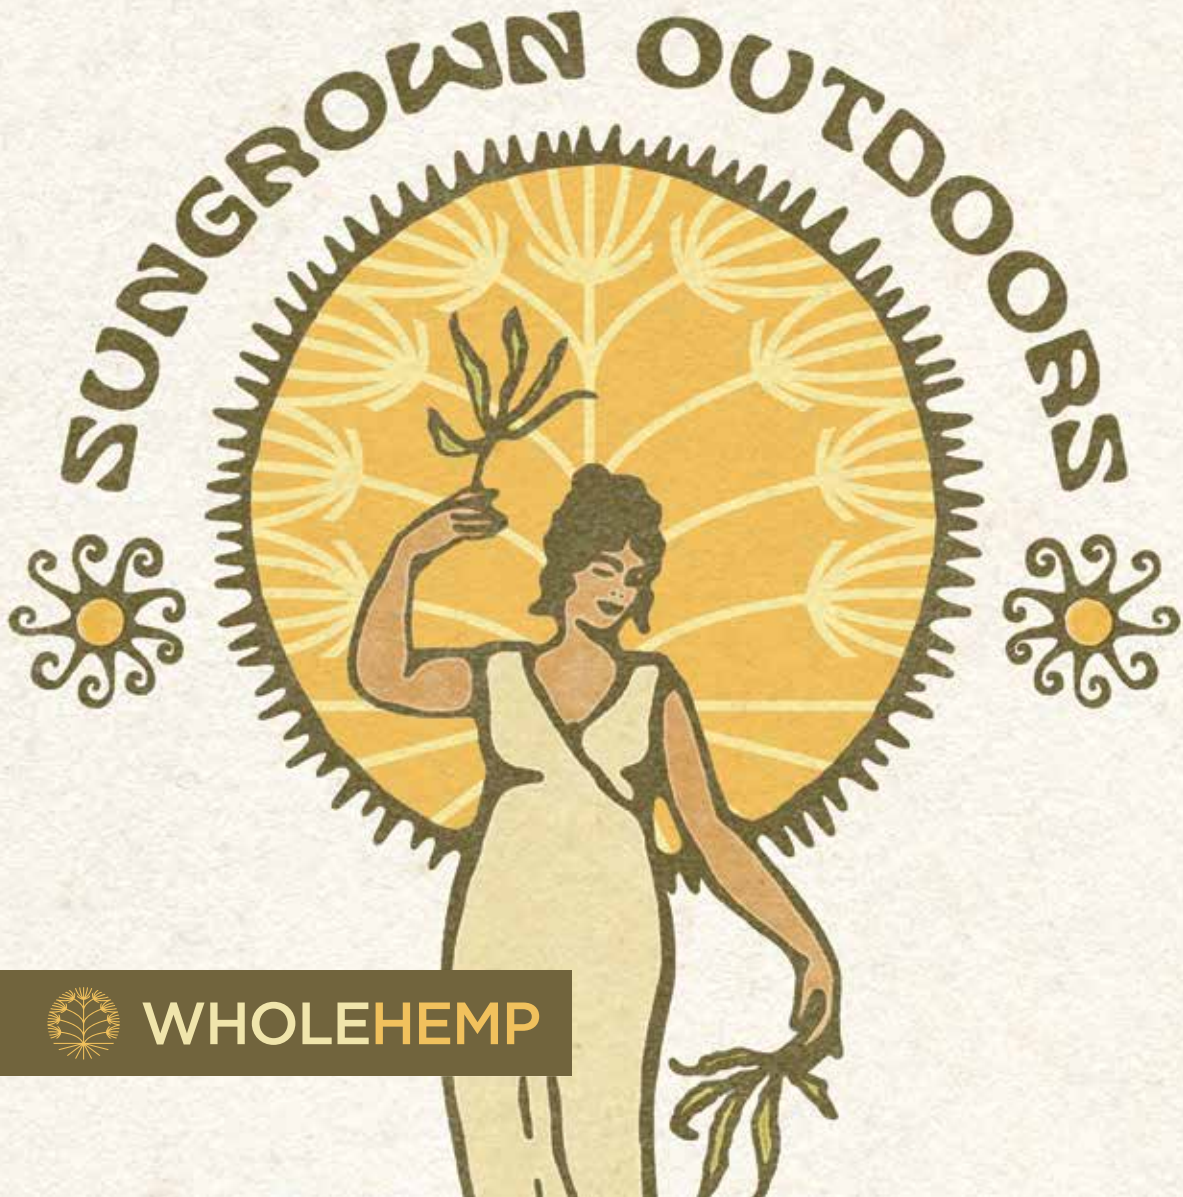

SMALL SCALE, CRAFT STYLE FARMING ALLOWS FOR HANDS-ON ATTENTION AND CARE WHEN GROWING OUR CANNABIS. AT WHOLEHEMP OUR FARMERS IMPLEMENT SUSTAINABLE METHODS OF CULTIVATION, SUCH AS PERMACULTURE TECHNIQUES OF COMPANION PLANTING. THESE REGENERATIVE METHODS UTILIZE VARIOUS NATURAL TECHNIQUES TO SUSTAIN A THRIVING ECOSYSTEM, SUCH AS INTERCROPPING WITH PLANTS THAT COMPLIMENT CANNABIS CREATES MICROCLIMATES THAT FIX NITROGEN INTO THE SOIL AND REDUCES THE NEED FOR FERTILIZATION AND IRRIGATION.

One of our core beliefs at WholeHemp is to be stewards of the environment and promote the benefits of living in co-operation with the land. Outdoor sun-grown cannabis also flourishes as an organic crop, requiring neither pesticides nor herbicides. With a regenerative approach to growing cannabis, not only does the cannabis thrive, but so too can the soil and surrounding ecosystems which in turn support healthier plants.

Cannabis plants grown outdoors under natural sunlight also develop a more robust and nuanced terpene profile. Studies have also shown that cannabis grown outdoors generally have an overall higher proportion of intrinsic cannabinoids (particularly CBD, CBC and CBG) and lower levels of oxidized and degraded cannabinoids than those of the same strains grown indoors.

All WholeHemp products are packaged in sustainable packaging – glass jars and zip pouches instead of plastic containers. Our hope for the future is that environmentally friendly options and practices become the norm instead of the alternative.
